INDUSTRY OVERVIEW

According to The Business Research Company (2024), the health and fitness sector includes activities such as operating gyms, providing personal training, organizing group classes (yoga, pilates, zumba, HIIT), and providing support services such as nutrition advice, physical rehabilitation, or smart exercise equipment.

Introduction

The Fitness & Gym industry is experiencing strong growth due to the healthy lifestyle trend and heightened demand for physical and mental care post-pandemic (Vietdata, 2024).

The Vietnamese fitness market is estimated to be worth hundreds of millions of USD, with an average growth rate of about... **20%/year**

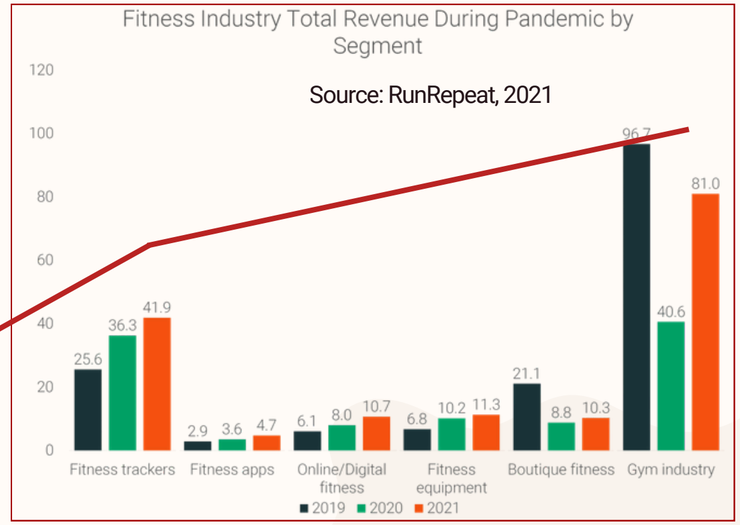

Source: IHRSA, Statista 2023

Technology trends

- Wearable Technology
- Mobile Exercise Apps
- Data-Driven & AI-Based Training
- IoT Integration in Smart Gyms

During the pandemic, fitness industry revenue has shifted strongly from traditional forms of exercise to digital technology and personal devices.

In Vietnam

(Cốc Cốc Research, 2024)

50,8 %
Practiced fitness-related activities

U25 tend to prefer **sports**
Aged 25 + interested in **fitness activities**

Behaviors & Habits

Motivation
> 50 %

Main reason:
- Protect and improve their health
- Relaxation and stress relief

Difficulties and barriers

Main barriers preventing people from training at professional fitness centers:
- **Time (32.7%)**
- **Space (27.4%)**
- **Cost (26.2%)**

As a result, many options for more flexible workout locations, such as at home or in public areas (schools, cultural houses, parks, etc.)

42 % Use **personal training (PT)** services

58 % **Do not,** mainly because they feel it is **unnecessary** (among those who have trained for more than 6 months - 45.9%) or because it is **too expensive** (among those who have trained for less than 6 months - 57.5%).

The fitness industry has opportunities to expand user reach through various types of content

TOP 3
Topics most users in the fitness sector are interested in:

diet plans

training knowledge and tips

exercises for specific body parts

> 40 % learn and practice through online workout videos

Opportunities to reach users via **digital fitness support platforms**, such as workout apps, training programs, and health tracking applications.

MARKET INSIGHTS

Insights were gathered from research reports, fitness communities, and TikTok content to highlight the most common challenges and needs of Vietnamese gym-goers.

RESEARCH & STATISTICS

High Drop-off Rate

70%

fitness app users **churn within 90 days** (CleverTap)

Repetitive & Boring Workouts

Users lose interest because workouts feel repetitive and not engaging.

Lack of guidance

Major engagement/retention issues stem from low confidence, poor onboarding, and fear of doing exercises incorrectly.

Low Motivation & Accountability

43%

People cite lack of motivation to exercise.

Lack of Personalization

Generic workouts don't fit personal fitness levels — causing injuries or frustration.

Digital news channel: Vnexpress, Healthnews

Many gym **injuries** occur due to improper form or equipment use, especially **without supervision.**

VNEXPRESS TIN NHANH VIETNAM

Group of sharing useful tips for Gymer in Facebook with 310 millions members

SITUATIONS	PROBLEMS
Gym-goers without PTs often record videos to ask others if their form is right	**Uncertainty about correct exercise form**
Users follow multiple fitness influencers with mixed messages on workouts and nutrition, leading to mistakes and plateaus.	**Confusing or conflicting advice** from social media
Many gym injuries occur due to improper form or equipment use, especially without supervision.	**Rising injury rates** from poor technique or misus

TikTok

Explored Tiktok using keywords "gym" and "fitness" to observe user behavior and comments

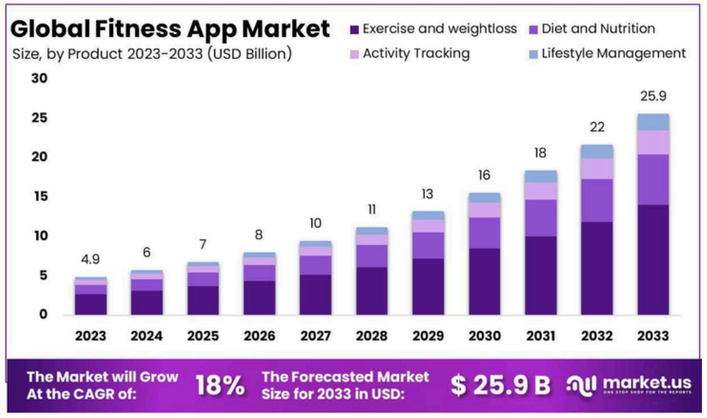

COMMENTS	PROBLEMS
"Can an inverted triangle body type achieve slimfit?"	**Lack of understanding** about body types and proper workout techniques
"How should I set the weight, should it match my body weight?"	
"How do I know what body type I have?"	
"Can beginners follow this series to lose weight?"	**Concerns** about training **effectiveness**
"I only felt stretching on day 2, not soreness afterward — does that mean it's ineffective?"	
"Is knee pain due to wrong form or weak knees?"	**Fear of injury** and **lack of professional guidance**
"Anyone in Saigon, District 10 or 3, want to work out with me? I feel shy going alone."	**Low motivation** and need for community connection

27.3K LIKES shows interest in fast-result content.

AIFIT INSTITUTE OF INNOVATION

COMPETITIVE LANDSCAPE

The fitness app market is growing strongly with the participation of "big players" and AI application startups. However, the segment of posture correction and real-time AI-powered motion analysis remains a potential gap to be exploited.

GROWTH TRENDS OF THE GYM & FITNESS MARKET

Arcording to **Statista**, the number of fitness app users increased by 113% in 2022, reaching over 660 million users, and the revenue generated by these applications also increased, reaching $30.98 billion USD. Due to the rapid expansion of the market, it is predicted that the payment segment will increase by an additional $19.33 billion in 2023 and will continue to grow at a CAGR of 14.34% by 2027.

USER' INTERVIEW

Basic Information

Minh Quân - **"Active Mover" segment**

- 20, 3rd - year student at UEH
- Major in Technology and Innovation
- Intermediate (sports-active, gym experience in the past)

Story

He has high intrinsic motivation but dropped out of the gym due to environmental and knowledge barriers, not laziness. His experience highlights the motivations, behaviors, and challenges faced by active users encountering specific obstacles in gym environments.

GOALS

- Maintain both physical and mental health.
- Enjoy workouts that are flexible, social, and engaging.
- Improve strength and overall fitness performance.
- Build a sustainable, enjoyable workout routine.
- Gain confidence and knowledge in training without external dependency.

PAIN POINTS

- Posture uncertainty leading to potential injury.
- High cost of personal trainers, which is unaffordable for students.
- Low engagement due to the isolating nature of the gym.
- Low motivation without a partner or competition.
- Need for flexible workouts to accommodate irregular student schedules.

NEED

- Affordable and accessible training guidance without the need for a personal trainer.
- Social or competitive elements that replicate the engagement of sports.
- Real-time posture feedback to build confidence.

USER' INTERVIEW

Basic Information

Thu Trang - **The Busy Professional**

- 27, Office worker
- Intermediate (sports-active, gym experience in the past)

Story

Her job requires her to sit in front of a computer for long hours, leading to issues with neck and shoulder pain and poor posture. She wants to exercise to improve her health and reduce stress, but her busy and often unpredictable work schedule prevents her from committing to a gym.

GOALS

- To alleviate back and shoulder pain and improve her posture.
- To increase her flexibility and energy levels after a tiring workday.
- To find a convenient workout solution that can be done quickly at home.

PAIN POINTS

- Post-work exhaustion makes driving to the gym difficult.
- Limited free time requires short, effective workouts (20-30 minutes).
- Uncertainty about correct form for back exercises despite watching online videos.
- Loss of motivation arises from the effort needed to plan home workouts.

NEED

- Short exercise routines focused on stretching, recovery, and posture correction suitable for office workers.
- An app that provides reminders and a pre-planned daily workout routine to eliminate guesswork.
- Extremely clear guidance, possibly with 3D models or motion analysis, to ensure spinal safety.

USER' INTERVIEW

Basic Information

Việt Đức - **The Goal-Oriented Improver**

- 24, is a freelance designer
- Intermediate gym-goer with basic experience but limited knowledge of proper form and technique.

Story

Duc has some experience working out at home using online videos and has achieved some initial results. However, he now feels he has hit a plateau and isn't seeing significant progress in his physique. He believes this is due to suboptimal form and posture.

GOALS

- To break through his current fitness plateau and see more defined muscle growth.
- To master the advanced techniques of exercises to maximize effectiveness and avoid potential injuries.
- To improve his posture in-depth, not just during workouts but also in his daily life.

PAIN POINTS

- Lack of Expert Guidance: Unable to correct form without assistance.
- Generic Information: Free online videos often lack personalization.
- High Cost of Personal Training: 1-on-1 guidance is too expensive.
- Self-Assessment Challenges: Hard to detect minor form errors alone.

NEED

- A tool capable of analyzing his posture in detail and providing instant feedback so he can make immediate adjustments.
- A personalized workout plan that automatically adjusts the difficulty based on his performance.
- An affordable alternative to a personal trainer that still maintains a high level of expert guidance.

USER' INTERVIEW

Basic Information

Hoàng Nhật - **The Hesitant Beginner**

- 20, 3rd - year student at UEH
- Major in Technology and Innovation
- Intermediate (gym experience in the past)

Story

Like many in Gen Z, Nhat understands the importance of having a good physique and being healthy, but he currently lacks the strong motivation to maintain a regular workout routine. He tends to work out at home for its convenience and privacy.

GOALS

- To start his journey of improving his physique and posture to feel more confident in daily life.
- To build a sustainable workout habit that is also budget-friendly.
- To find an effective workout method that he can do right from home

PAIN POINTS

- High Costs: Gym memberships and personal trainers are too expensive.
- Lack of Time: An unpredictable work schedule makes gym attendance difficult.
- Knowledge and Confidence Gap: Concern about improper form and potential injury when working out alone.
- Low Motivation: Tends to give up without quick results or external support.

NEED

- A solution that provides detailed, visual guidance for each exercise so he can confidently perform them correctly.
- A tool that can analyze and correct his posture in real-time, acting as a "virtual PT."
- A flexible, beginner-friendly workout plan that can be done at home.

Persona

Basic Information

- **Name**: Hoang Nhat – The Hesitant Beginner
- **Age**: 20
- **Gender:** Male
- **Education:** 3rd-year student at UEH, majoring in Technology & Innovation
- **Location**: Ho Chi Minh City (urban, living in a rented room)
- **Monthly Income**: 2–3 million VND (part-time job + family support)
- **Device**: Mid-range Android smartphone
- **Fitness Level**: Beginner to Intermediate
- **Living Situation**: Small rented room with limited space for workout equipment
- **Lifestyle:** Busy with classes, assignments, and part-time work; irregular schedule

Personality Traits

- Typical Gen Z: convenience-driven, visual-first
- Slightly self-conscious about body image
- Lacks consistency and discipline
- Tech-comfortable: open to AI, new apps, digital coaching
- Needs external motivation to stay on track

KEY BEHAVIOUR

- Exercises inconsistently (mood-based) → needs reminders & progress tracking
- Watches TikTok/YouTube workout videos but unsure which ones are correct
- Afraid of training incorrectly → worries about injuries
- Prefers home workouts for privacy and cost savings
- Likes simple, intuitive apps
- Responds well to gamification and rewards

PAIN POINTS

- Gym memberships & personal trainers are too expensive
- Uncertainty about proper form → fear of injury
- Lacks knowledge to build a workout routine
- Gets discouraged quickly when results aren't immediate
- Overwhelmed by too many fitness apps that lack clear guidance

NEED

- Clear, visual, step-by-step exercise instructions
- Real-time posture and form correction powered by AI
- Beginner-friendly workout plans requiring little to no equipment
- Short routines (6–20 minutes) that fit into a chaotic schedule
- A “virtual PT” experience to boost confidence and motivation

PROBLEM STATEMENT

IDEAL CUSTOMER INSIGHTS

Hoang Nhat - **The Home-Fitness Seeker**

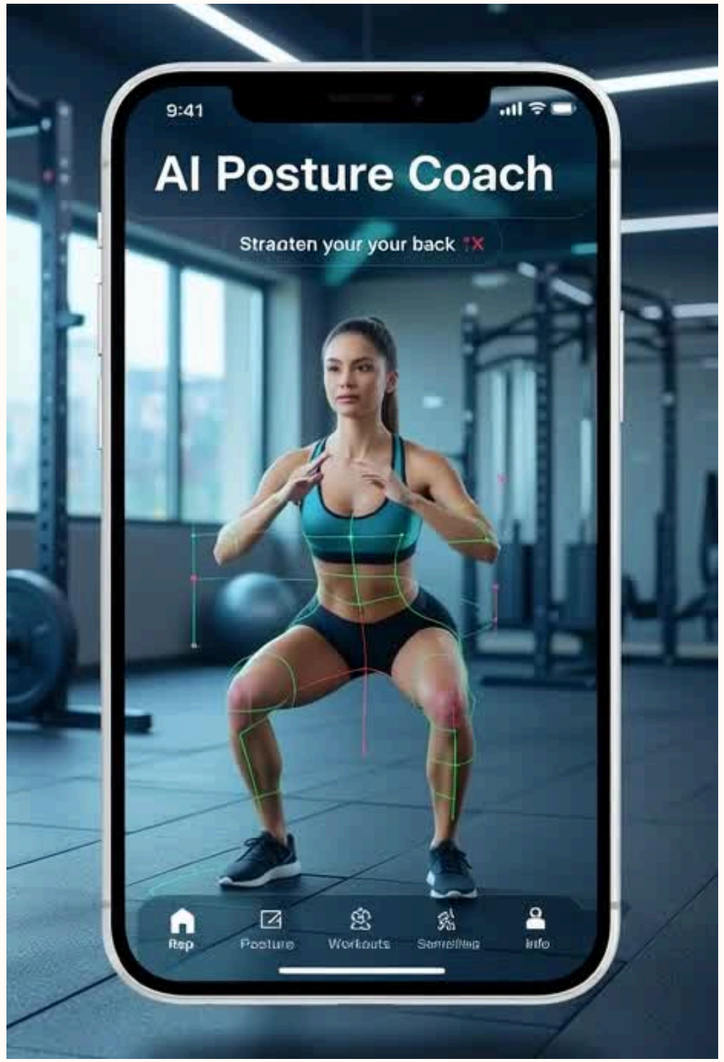

- **Target Segment:** Young professionals with past workout experience but currently inconsistent.
- **Core Goal:** Seek to improve appearance, posture, and holistic well-being via convenient, self-sustaining home workouts.

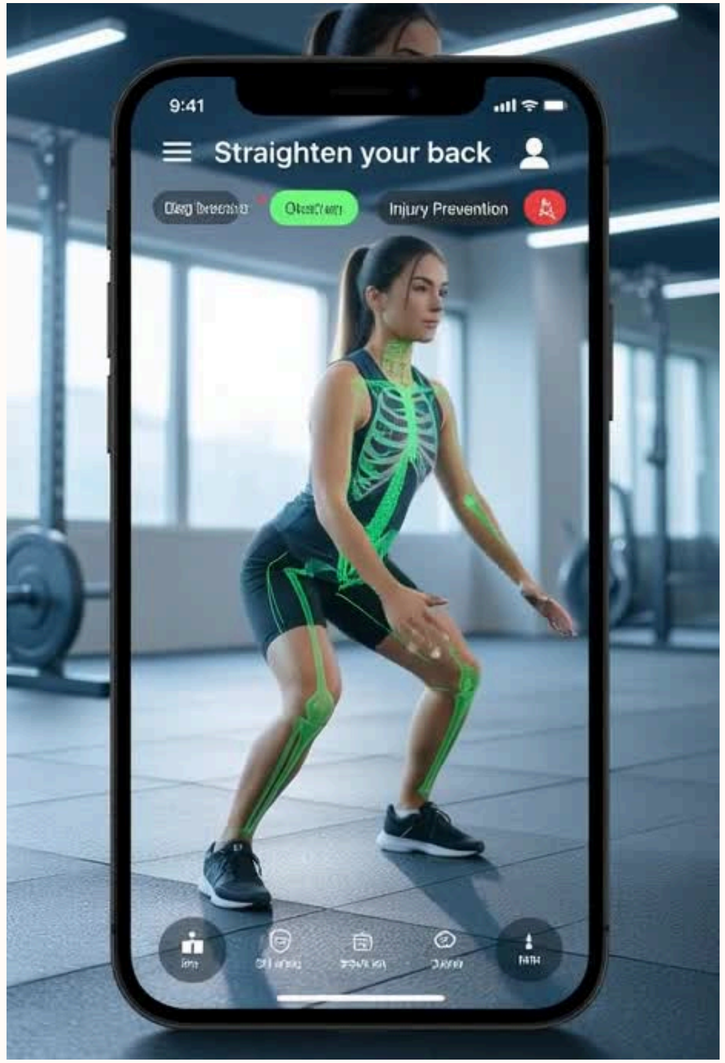

Gen Z (20 - 25 years old), who do **not hire personal trainers (PT)** and are **interested in improving their physique and workout posture**, tend to exercise to **enhance their health** and **need a comprehensive solution** that **helps correct their posture**

ROAD MAP

PHASE 1

VIDEO RECORDING

REC

+

PHASE 2

DETAILED AI POSTURE ANALYSIS

REAL-TIME INTERACTIVE VOICE COACHING

PHASE 3

PT MARKETPLACE (TWO-SIDED PLATFORM)

PHASE 4

LEAN MODEL CANVAS

Problem

Risk of injury due to incorrect posture when working out alone without posture checking.

Solution

AI Camera analyzes movement

Dashboard to monitor progress & warn about injury risks

Unique Value Proposition

AI application that helps correct posture instantly.

Unfair Advantages

AI model analyzed and developed specifically from Vietnamese body data.

Real-time posture reporting

Customer Segments

Gen Z (18–35y) working out at home or gym without hiring a PT.

EARLY ADOPTER

Young people who want to reduce injury risks when self-training.

Existing Alternative

No similar app currently exists.

Key Metrics

Daily Active Users (DAU)

Retention Rate (Day 7/30/90)

Churn Rate

High-Level Concept

Freemium

Tailored posture recommendations based on the user's body condition.

Channels

Mobile App (iOS / Android)

Cost Structure

- Development & maintenance of AI/Camera/ML Model
- Server & Cloud GPU for real-time video processing
- Marketing & ads
- Licensing fees for motion/pose datasets

Revenue Streams

Packages

AIFIT MARKETING PLAN

PHASE 1: Build Awareness & Acquisition

Main Objective: Achieve 50,000 potential customers, define Product-Market Fit (PMF).

CORE ACTIVITIES

Foundation

- Design Landing Page emphasizing AI USP
- SEO with Long-tail Keywords.

Awareness/Acquisition

- Build Fanpage & TikTok Channel
- Run Paid Ads testing "The Accuracy Challenge" video
- Optimize ASO with keyword "AI Posture Correction".

Testing

- Collaborate with Micro - Influencers to demonstrate AI error correction feature.

Conversion

- 30-day Premium Free Trial campaign for new users.

PHASE 2: Retention & Conversion

Main Objective: Retention after 3 months (R90) reaches 40% , Premium Conversion Rate 3%

CORE ACTIVITIES

Conversion

- "7 Days feel the difference" Campaign
- Behavioral Ads Retargeting for different user segments (e.g., Trial expired, not activated).

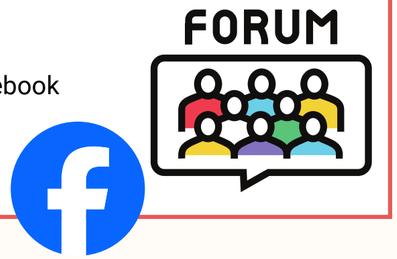

Retention

- Personalization based on Errors (AI-Powered Personalization)
- Send weekly personalized Report emails
- Fix-Your-Flaw Challenge.

Community

- Create a separate Forum/Facebook Group for Premium Users (exclusive content).

PHASE 3: Scaling Growth & Optimization

Main Objective: Achieve LTV:CAC Ratio 2.5:1, Increase ARPU by 15%, Achieve Organic Install Rate / Total Installs over 40%.

CORE ACTIVITIES

Acquisition (Expansion)

- Launch "Muscular Cat" Mascot (animation video, memes, personalized push notifications).

Feature Development & Retention

- Launch Streak feature ("Keep the Streak with Cat") and Leaderboard
- Give vouchers for streaks >= 60 days.

Growth

- Initiate "Share Workout Results" feature with incentive and collect Testimonials for Ad Creatives.

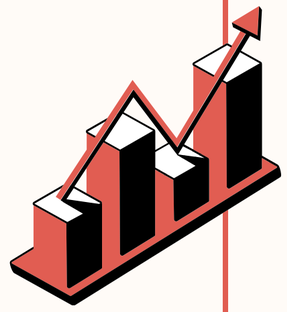

Optimization (Ops)

- Upselling to Pro/Advanced plans based on AI data
- A/B Test Pricing and CTA
- Funnel Analysis to identify and optimize highest Churn Rate points.

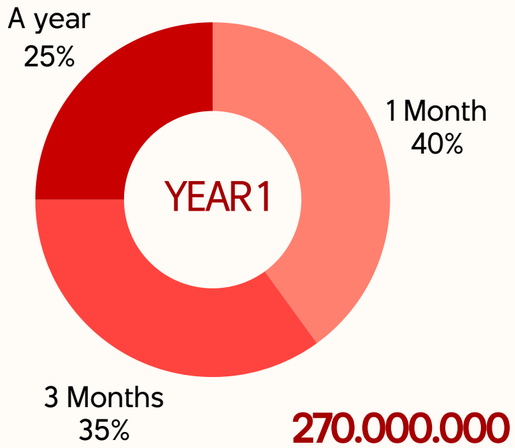

AIFIT

SALE PLAN

	Sales Goal	Activation & Value KPIs	Conversion & Retention KPIs
Year 1 Validation	• Prove viable conversion. • Achieve **1200 Paid Users.** 	• Trial Activation Rate 50% (Users who worked out ≥ 1 time). • **7-day Trial Retention Rate ≥ 60%.**	• **Premium Conversion Rate 1.5%.** • % of Users choosing Annual Plan ≥ 25%. 
Year 2 Scaling	• Increase conversion to 3%. • Achieve **12,500 Paid Users.** 	• % of **Premium Users joining Group ≥ 50%.** • % of users opening Weekly Reports ≥ 70%	• Premium Conversion Rate 3%. • Conversion Rate from Email/Automation ≥ 5%. • **R90 Retention Rate 40%.** • **Churn Rate reduction ≥ 10%.**
Year 3 Profitability	• Increase ARPPU 15%. • Achieve **20,000 Paid Users.** 	• **Viral/Sharing Rate increase ≥ 50%.** • Organic Downloads increase ≥ 40%. DOWNLOAD	• **Optimize LTV:CAC Ratio 2.5 : 1.** • % of Users upgrading to Pro Plan ≥ 5%. • % of Users choosing Annual Plan ≥ 50%.
